EDUCATION

June 2025

TAFE Queensland QLD

Certificate IV Cyber Security

June 2024

TAFE Queensland QLD

Certificate II Autonomous Technology

PROFILE

Cyber security graduate with hands-on experience in Linux, computer troubleshooting and home server management for media and file sharing. Deployed network-wide ad filtering using a Raspberry Pi and built a basic robot with Python scripting. Have knowledge in configuring Cisco routers and switches (VLANs, access controls, routing protocols) to strengthen network security. Completed a TAFE course involving collaboration with classmates on real-world scenarios and hands-on hardware projects.

EXPERIENCE

Research Intern at Cloud Coders: Researched potential future clients, compiled outreach databases in spreadsheets, and got to learn what it's like to work with a team.

KEY SKILLS

- **Operating Systems and Platforms**
  Linux (various distros), Microsoft Windows, Raspberry Pi
- **Networking and Infrastructure**
  IP Networking, routing protocols, firewalls, encryption, network troubleshooting, server hardware
- **Cybersecurity and Monitoring**
  Security Information & Event Management (Splunk), web security, security awareness, incident remediation
- **Hardware and Maintenance**
  PC/server assembly, hardware troubleshooting, soldering, media/file-sharing servers
- **Software and Tools**
  Microsoft Office 365, Microsoft Word, software updates, email systems, desktop support
- **Scripting and Automation**
  Python programming, robotics, Raspberry Pi projects, ad-filtering deployments
